Our goal is to help you make watchable videos using a smartphone, tablet, or some other mobile device. We will cover both technical tips—cinematography, lighting, sound, video editing etc.—and a wide range of video projects (genres) including story videos, documentaries, music videos, blogs, instructional videos, research videos, and product reviews.
To accomplish our goal we will:
• Publish practical tips from professionals and community members
• Exhibit mobile-shot videos that will instruct or inspire…or both
• Hold contests designed to explore specific techniques or applications
• Find answers to questions that subscribers pose
• Host forums that will facilitate mutual help and collaboration
Provide instructional resources to teachers.
